

COLLABORATION PORTAL

SAPHIRE Build Collaboration Portal lets you maintain real-time information between the office, the field staff and vendors creating visibility and accuracy. View schedules, change orders and notifications to plan work crews and inventory. Reduce data entry and review invoices 24/7 while keeping on budget and on track.

Integrate your operations with your trade partners with SAPHIRE Build's Collaboration Portal. Submit requests for bids electronically and analyze bid information submitted electronically through the Collaboration Portal. Communicate via electronic messaging with automatic notifications as information is updated or send messages on demand to trade partners.

Manage your trade partner related processes more effectively from requests for bid, plan and specification information to purchase orders, job schedules and service orders through the Collaboration Portal. Document quality issues, including pictures, for each job and provide access for your trade partners to respond and address.

Empower your trade partners to access all job specific information online. Trade partners can download master or job specific plans, view job schedules, check payment status and access customer service orders.

“SAPPHIRE Build provides everything we need. We get schedule updates, PO, VPO and back-charge notifications. SAPPHIRE Build also provides closed home notices and customer service orders. We really like being able to go online to check the status of payments and access plan information whenever we need it.”
